CASTERS TO MEET YOUR NEEDS

We rigorously tested and selected the optimal casters for each of our products—creating the most efficient and durable material handling solutions for your specific requirements. (See caster options on page 16.)

POLYOLEFIN
Hard-tread polyolefin casters roll easier than soft tread casters. Non-marking, impact and chemical resistant casters won't flat-spot under static loads or pick up metal shavings, nails, and other debris. Excellent on concrete, wood, carpet, and steel surfaces.

PNEUMATIC
Pneumatic casters provide a cushioned and quiet ride for fragile loads, making them ideal for rough and uneven surfaces, inside and out. Excellent on virtually all surfaces from smooth concrete to gravel.

THERMOPLASTIC RUBBER (TPR)
TPR casters absorb shock, and provide floor surface protection and quiet operation. Excellent on linoleum, tile, terrazzo, wood, smooth concrete, and carpet.

Rugged.

DURAMOLD™ REAL WORLD RUGGED — TESTED TOUGH

Rubbermaid's exclusive Duramold™ technology exceeds the highest performance standards in the industry. We test and retest our products to meet rigorous durability standards, and our new material handling products are no exception. Real-world rugged durability, innovative technology, and best-in-class features combine to create longer lasting products that carry heavy loads—and make your work easier.

DURAMOLD™ precision engineered resin & steel composite decks
HOLD & TRANSPORT UP TO 2500 lbs.
of weight load capacity

40 buckets of sheetrock compound weighs over 2,400 lbs.—that's a load!

WILL NOT WARP, DENT, SPLINTER, RUST, OR ROT

Tough, resilient surface absorbs impact and provides quiet operation. Virtually maintenance-free: resistant to most chemicals, impervious to water damage, and is easily cleaned.

Metal—dents and rusts

Wood—splinters and rots

Duramold™ decks are formed from a precision engineered resin and metal composite structure that is lighter than typical steel/wood products without sacrificing strength, which enables weight reduction and improved ergonomics.

PUT YOUR EFFORT INTO MOVING YOUR PAYLOAD, NOT YOUR TRUCK

DURAMOLD™ HAS THE HIGHEST STRENGTH TO WEIGHT RATIO

when compared to metal, wood, and solid plastic decks.

35%

lighter weight construction to transport the same payload
