 Refrigerators

**Model : TGM-11RV-N6**

### ≡ FEATURES & BENEFITS ≡

- **Hydrocarbon Refrigerants (R-600a)**  
 With innovative and eco-friendly technology, Turbo Air brings you hydro-carbon refrigerators designed to meet the new standards of EPA and DOE in 2017. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to the global warming (ODP-0, GWP-3).
- **Hot gas condensate system** Only Turbo Air models  
 Through Turbo Air's creative innovation, the condensate system surfaces have been specially treated to resist corrosion. This not only increases efficiency without the risk of refrigerant leakage from corrosion, but also prevents the overflow of condensate water.
- **Double pane glass door with Low-E glass**  
 Energy saving double pane glass door is equipped with Low-emissivity glass, which reduce outer heat gain and decrease energy consumption. It enhances energy efficiency and minimizes condensation. Lightweight door construction also reduce door maintenance and bushing wear, which in turn facilitates smoother door openings.
- **LED lighting interior**  
 Brighter and longer lasting LED lights provide attractive, enhanced illumination compared to fluorescents. It saves energy by producing less heat, while maximizing the visibility in the display area.
- **Adjustable, heavy duty, PE (polyethylene) coated wire shelves**
- **Bottom mount compressor unit**
- **Ergonomically designed door with easy grip handle**
- **Magnetic door gasket**
- **High-density polyurethane insulation**  
 The entire cabinet structure is foamed-in-place using high density, CFC free polyurethane insulation.
- **Refrigerator holds 33°F ~ 38°F for the best in beverage preservation**
