Noble Glass Rack Sizing Guide

NOTE: PLEASE PRINT THIS PAGE FOR ACCURATE SIZING

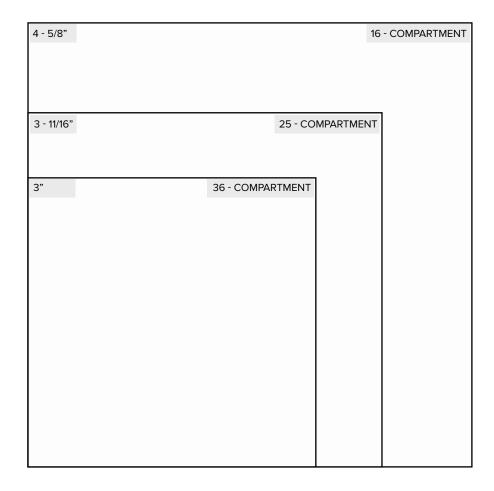

To determine both the number of compartments and the necessary height of your Noble glass rack, simply print the attached guide onto standard 8-1/2" x 11" paper and follow these simple instructions.

NUMBER OF COMPARTMENTS

Measure the maximum diameter of your glass (stemware or tumbler) to determine the number of compartments.

- a. Turn your glass upside down and place it over the center of the glass rack sizing guide.
- b. Looking down the base of the glass (or the stem on stemware), gradually slide the glass as far as possible toward the bottom left-hand corner of the guide without any part over the boundaries of the guide.
- c. Again looking down the base of the glass, note the smallest square on the guide where the largest outside diameter of the glass lines up completely. No part of the glass should touch any part of the square.
- d. This square indicates how many compartments your glass rack needs to have.

Maximum Glass Height

Measure the maximum height of your glassware (stemware or tumbler) to the top edge of the rim to determine the compartment height.

- 1. Print out this page at 100%
- 2. Place your glass on a flat surface
- **3.** Hold the paper behind the glass and mark where the top of the glass lines up
- **4a.** If it falls in a white area, use the first rack size above it e.g. Glass Measures 6½", Choose the 7¼" Rack
- **4b.** If it falls in a gray area, use the second rack size above it e.g. Glass Measures 7", Choose the 8¾" Rack

	10 ¹ / ₈ "
ware le rim to	8 ³ / ₄ "
rk where	7 1/4"
ck size above it. 4" Rack	6 ⁵ / ₈ "
ack size above it. Rack	5 ³ / ₄ "
Rack Height ——	4"
Safety Buffer Zone Maximum Glass Height	3 1/8"
