

Instructions For Use

Thank you for purchasing the Saf-T-Scoop® & Guardian System™. The system features Universal Mounting Options: inside or outside of an ice bin, permanently or temporarily and easily fits a variety of bin-lip dimensions using the included wire hangers. Choose one of the three options below which best fits your operation:

Your system includes:

(1) Saf-T-Scoop™

(1) Guardian Holding Unit

(1) Drain Cap

(1) Mounting Bracket

(2) Wire Mounting Hangers

(2) Suction Cups

Guardian Unit & Wire Mounting Hanger Assembly

1a

1b

1. How to assemble Guardian unit:

Select one of the 2 wire mounting hangers for the width of the bin lip. Position the wire hanger under the mounting bracket locking rails (1a) and slide upward into place. Then position Guardian into locking rails on mounting bracket and slide bracket upward into place (1b).

2

2. How to fit wire mounting hanger to bin lip:
Bend the outside end of the hangers as needed to fit bin lip and set into place.

Inside Bin Mounting

Mount Guardian System™ into place using either the mounting bracket or suction cups **or for best results mount with wire hangers AND suction cups.**

Wire Mounting Hanger

Optional Drain Cap (not shown)

Suction Cups

Optional Drain Cap (not shown)

Wire Mounting Hanger & Suction Cups

Optional Drain Cap (not shown)

Optional Drain Cap

Suction Cups

Using Suction Cups:

Secure suction cups onto mounting bracket and press Guardian System™ into position. Suction cups will hold Guardian in place for extended periods based on the type and texture of surface.

For best results: Use the wire hanging bracket and suction cups. Make sure mounting surface is clean and dry. Slightly moisten suction cup surfaces before use.

Surface Mounting

Permanent Mount (with Mounting Hardware):

Secure the bracket to the surface by using an appropriate sized drilled hole; screw into place using a washer on the front and back of the bracket (permanent mounting hardware not included). Slide the bracket into position using the key holes and screw tight into place.

NOTE: Consult your health department and equipment manual before permanently mounting inside an ice or food bin.

Optional Drain Cap Drain Hole:

Allows excess water to drain via hose into ice machine drain. Drill through center hose nipple and attach drain hose securely (not included). Direct drain hose near drain allowing 2" air gap to prevent backflow.

Removable drain cap gives the option of allowing excess water to drain out or be retained. Use of the drain cap is recommended for exterior mounting applications where excess water may accumulate on a floor causing a safety hazard.

Daily cleaning:

Remove the guardian holding unit from the mounting bracket by lifting the unit upward to release it from the bracket locking channels. Clean and sanitize the scoop and guardian using standard manual or mechanical warewashing procedure and equipment. Commercial dishwasher safe.
