# CUTTING-EDGE MICROFIBER STRING MOP SYSTEM NEW!

# PATENT PENDING

# Choose the Right Mop for the Job

Unger offers three distinct styles of microfiber string mops - each one designed specifically for the level of dirt removal necessary for various cleaning jobs. Each design offers different grades of durability and absorbency and are ergonomically designed for your worker's needs. All of Unger's string mops are constructed from the best grades of microfiber.

# SmartColor™ RoughMop HEAVY DUTY

- Hallways
- Kitchens
- Restrooms
- Dining Halls

The RoughMop series is the superior choice for mopping that is done all day, every day.

# SmartColor™ WingLite MEDIUM DUTY

- Common Areas
- Small Restrooms
- Offices
- Stairways

This mop incorporates the new patent pending "W-Stitch." The lack of excessive weight makes this mop the perfect choice for getting the job done in less time.

Mop Holder

# SmartColor™ MicroLite LIGHT DUTY

- Classrooms
- Offices
- Single Fixture Restrooms Low-Traffic areas

The lightest mop in the series, the MicroLite is perfect for guick clean up of low-traffic areas. These are areas that do not require daily cleaning and are generally maintained on a weekly basis.

The ST18 MicroLite series mops have the advantage of extra scrubbing power. Simply angle the pole upwards in order to utilize the larger scrub pad area to remove tough dirt from surfaces.

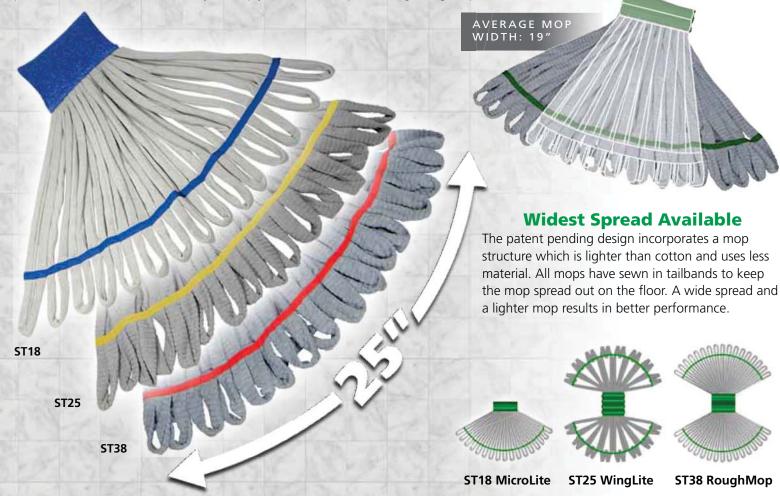

# CUTTING-EDGE MICROFIBER STRING MOP SYSTEM NEW!

### **BETTER PERFORMANCE: Work Faster**

Unger has revolutionized mopping with new patent pending microfiber string mops. Each mop has been designed for a specific type of mopping job and all feature the widest spreads available on the market. Combine this with Unger's SmartColor™ Coding System to prevent cross-contamination and you simply have the best performing string mop available.

# **Saving Time = Saving Money!**

With a design that incorporates a wider mop spread and lighter mop weight, Unger Microfiber String Mops can get the same surface area cleaner in less time.

### SMART CLEANING: Work Smarter

Unger has established a grading system featuring several performance factors that have been tested, measured and validated. These tests measure durability, scrub factor, absorbency, and wash cycles. The grading system allows you to purchase the right mop at the right price for the right job.

# **Unger's String Mop Grading System**

**DURABILITY • ABSORPTION • COST** 

ST18 MicroLite Series Durability\*\*: 2000 Scrub Factor\*\*: 51 Absorbency\*\*: 800 ml / 27 fl oz

Wash Cycles: 200 Single Sided

**ST25 WingLite Series** Durability\*\*: 2000 Scrub Factor\*\*: 34 Absorbency\*\*: 1000 ml / 34 fl oz

Wash Cycles: 200

Double Sided

ST38 RoughMop Series Durability\*\*: 2000 Scrub Factor\*\*: 34 Absorbency\*\*:

1100 ml / 37 fl oz Wash Cycles: 200

Double Sided

ST30 RoughMop Series Durability \*\*: 4000

Scrub Factor\*\*: 51 Absorbency\*: 1200 ml / 40 fl oz

Wash Cycles: 500 Double Sided

ST45 RoughMop Series Durability\*\*: 4000 Scrub Factor\*\*: 51

Absorbency\*\*: 1400 ml / 47 fl oz

Wash Cycles: 500

Double Sided

Other **XL Cotton Mops** Microfiber

#### **Test Descriptions:**

#### **Durability (Wear Cycles)\*\***

The higher the factor, the greater number of times the microfiber cloth can be moved across an abrasive surface before wearing through and degrading or developing holes

#### Scrub Factor (Abrasiveness)\*\*

The higher the scrub factor, the better the performance of the cloth in removing dirt and bacteria from surfaces and microscopic crevices

#### Absorbency\*

The higher the factor, the more liquid the cloth will absorb and hold.

#### **Wash Cycles**

XL Mops

A higher number of wash cycles indicates the longevity of the cloth through machine wash and dry cycles before deteriorating.

# **The Unger**

\*Standard US Industry Test • \*\*ASTM Tests

Unger offers the only microfiber string mop products that feature tested grading results of each mop series.

**Labeling System** 

Each label details the performance rating of durability, scrub factor, absorbency and wash cycles.

# CUTTING-EDGE MICROFIBER STRING MOP SYSTEM

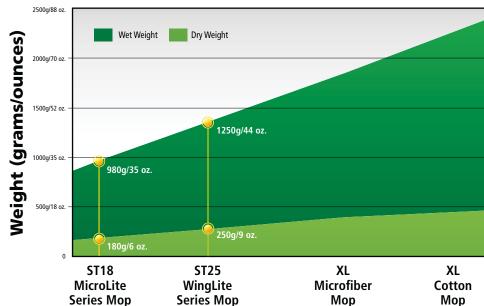

## PATENT PENDING

## **ERGONOMIC DESIGN: Work Safer**

Both Unger's WingLite and MicroLite series are engineered to be light when wet or dry. Lighter mops are easier to control and work with compared to heavier cotton or synthetic mops. Workers will be able to perform their daily cleaning duties faster with less fatique.

# **Wet/Dry Weight Comparison**

## **Green Cleaning with Microfiber**

Unger products are environmentally friendly and contribute to credits towards the U.S. Green Building Councils LEED for Existing Buildings Operations and Maintenance Program.

Microfiber tools are considered green because they use less water and chemicals than traditional cotton products to clean.

# The SmartColor™ Coding System

The SmartColor Cleaning System combines superior technology with the productivity and sanitation benefits of visual coding.

Workers use red microfiber mops in the restroom, green in the kitchen and food service areas, yellow in specialty areas and blue for general and light office cleaning.

Cleaning managers can customize a color code system to meet the unique needs of their facility.

The color coding system reduces cross-contamination, improves performance and leads to cleaner facilities.

Restroom High-Bacteria Areas

Speciality Areas Laboratory Gymnasium

Break Room Kitchen Food Service Area

General Areas Low-Risk Bacteria Areas Office/Lobby/ Classroom
